

Emergency Planning Policy

1. It is the policy of OPTIONS to protect our residents, staff and visitors within our facility, from harm during emergency events. To accomplish this, we have developed procedures for specific hazards, which build upon the strategies in our *Continuity of Operations Plan*. The priority is to ensure the safety of the persons served and staff during an emergency disaster situation. In the event of a significant earthquake, this facility is prepared to maintain essential care and services for a minimum of 72 hours and protect persons served from harm through the following actions.

INITIAL RESPONSE: See Earthquake Protocols

- 1.1 The Lead staff at each facility will be responsible for ensuring all persons served are safe and accounted for. The Lead staff will be designated as the point person for communicating and coordinating the emergency response plan.
 - 1.1.1 Staff will contact an Administrator at the main office at (805) 772-6066 or follow the disaster/emergency phone tree to contact an OPTIONS Administrator.
 - 1.1.2 The Lead staff will identify any safety hazards, assess damage to facility infrastructure, including the status of all utilities, ability to sustain operations, and report to the administrator in charge
 - 1.1.3 Assess status of external sites including: exterior shelter sites, structures, fences and gates, external lighting, roadways, trees and water flow, debris, and sidewalks.
 - 1.1.4 Assess all onsite communications equipment for operational status; activate contingency plans as needed.
 - 1.1.5 Ensure that unsafe areas are restricted by signage or barrier tape, or by posting staff to monitor entry points.
 - 1.1.6 Gather emergency food supplies, water, equipment, emergency supplies, and medication to sustain operations.
 - 1.1.7 Inspect all onsite supplies and equipment for inventory and damage.

Emergency Planning Policy

- 1.1.8 Prepare for evacuation if needed. Follow evacuation policy #400.4 if orders are given by authorities or the administrator in charge.
- 1.2 The first administrator contacted (CEO, CFO, Program Director, or HR Director), will assume responsibility of coordinating response efforts and will resume efforts to contact the CEO.
- 1.3 The administrator in charge will coordinate the following:
 - 1.3.1 Activate search teams if needed; integrate efforts with local public safety personnel.
 - 1.3.2 Communicate with local emergency operations center, response officials, TCRC OD and State Licensing agencies give info on the status of the facility and impact on internal infrastructure and services.
 - 1.3.3 Gather external situational status (weather, impact to roads, utilities, scope of damage, evacuation routes) and infrastructure status through local officials and other channels for reliable information.
 - 1.3.4 Activate the communication plan and brief staff, persons served and families on the situation and plan as soon as possible.
 - 1.3.5 As indicated by the initial assessment of the situation, activate Power Outage, Evacuation and/or Shelter in Place policies and procedures.
 - 1.3.5.1 Coordinate with OPTIONS' internal programs to determine the status of all sites in the event of an evacuation.
 - 1.3.5.2 Coordinate with local shelters and evacuation sites as needed
 - 1.3.5.3 Contact agencies with reciprocal agreements to coordinate re-location if necessary
 - 1.3.6 Initiate requests for external inspection of the building's integrity, if damage is evident.

Emergency Planning Policy

- 1.3.7 Coordinate the response-specific resident care plans including any medical treatment needed to treat injuries to persons served, visitors, and staff.
 - 1.3.8 Coordinate the transportation services (ambulance, air medical services, and other transportation) to ensure safe relocation, if necessary. See Evacuation and Transportation Plan 400.4
 - 1.3.9 Coordinate the monitoring of staff and volunteer usage, track time. If needed, screen volunteers
- 2 RECOVERY: When the Earthquake and immediate aftershocks have subsided and officials determine the facility is safe, the CFO, in conjunction with the OPTIONS maintenance contractor, will assess any damage to the facility infrastructure, including the ability to sustain operations. Repairs will be completed, as necessary, in order to restore daily activities.
- 2.1 Residents, families/representatives, local response authorities, and TCRC and CDPH will be notified of the return to normal operations
 - 2.2 Staff will continue to assess residents for adverse impacts from the incident and will report any change in condition to the RN to assess.
 - 2.3 The CEO will work with OPTIONS' Administrative Team to work with insurance, funding agencies, local, state, and federal emergency management, to begin reimbursement procedures for resident billing and cost expenditures related to the event.
